Notice of Calculation of Non-operating Revenue (Foreign Exchange Gain)

Nichicon Corporation calculated the following non-operating revenue (foreign exchange gain) for the Nine Months Ended December 31, 2014 (April 1, 2014 to December 31, 2014).

1. Non-operating Revenue
Due to recent exchange rate fluctuations, in the Nine Months Ended December 31, 2014 (April 1, 2014 to December 31, 2014), Nichicon calculated a foreign exchange gain of 1,584 million yen as non-operating income. This is primarily because foreign currency assets and debts at the end of the third quarter of fiscal 2014 were valuated at the exchange rate on that day.

2. Effect on Financial Results
The final amount of the foreign exchange gain or loss for all of fiscal 2014 will depend on how exchange rates move in the next few months. If it is ascertained that this gain or loss will have a major effect on the financial results for the consolidated fiscal year ending March 31, 2015, Nichicon will disclose this at the earliest possible time.
